

'HYDROPRINT' POLYESTER FILMS FOR UVC INKJET & SILKSCREEN

Kernow Hydroprint films deliver all the dimensional stability and colour advantages of polyester being tearproof, waterproof and having the added benefit of surface coatings that improve ink adhesion, a real challenge with UVC inkjet printers Especially to be recommended where the product will be repeatedly handled and rolled In addition, anti-static additives improve runnability for automatic machines

	base mic.	total mic.	core mm	Width mm		Length m
Hydroprint - Matt White 145HWNM - 145 microns	125	145	76	914	x	100
<i>Enhanced ink adhesion, anti-marking, resistant white back coating for static control</i>				914	x	200
Highly suitable for scrolling banners and instant roll-up graphics						
Hydroprint - Matt White 195HWNM - 195 microns	175	195	76	914	x	50
<i>Enhanced ink adhesion, anti-marking, <u>double-side printable</u></i>				914	x	100
Highly suitable for scrolling banners and instant roll-up graphics						
Hydroprint - Matt White 270HWNM - 270 microns	250	270	76	1270	x	50
<i>Enhanced ink adhesion, anti-marking, <u>double-side printable</u></i>				1270	x	100
Ideal for pop-up and 'drum-kit' displays						
Hydroprint - Matt Lightblock 153HML - 153microns	125	153	76	914	x	50
<i>Anti-reflective, marr-resistant surface for optimum ink adhesion, scratch and water resistance</i>				914	x	100
<i>Bright-white front but lightblocking <u>anti-static</u> grey back for >98% opacity against rear lights</i>						
Instant roll-up displays: lamination only necessary for aesthetics and ultimate protection						
Hydroprint - Matt Lightblock 204HML - 205microns	175	205	76	914	x	50
<i>Anti-reflective, marr-resistant surface for optimum ink adhesion, scratch and water resistance</i>				914	x	100
<i>Bright-white front but lightblocking <u>anti-static</u> grey back for >98% opacity against rear lights</i>				1524	x	100
Instant roll-up displays: lamination only necessary for aesthetics and ultimate protection						
Hydroprint - Matt Lightblock 360HML - 360microns	330	360	76	900	x	30
<i>Anti-reflective, anti-marking surface for optimum ink adhesion, scratch and water resistance</i>				900	x	100
<i>Bright-white front but lightblocking <u>anti-static</u> grey back for >99% opacity against rear lights</i>				MTO 1340	x	50
Ideal for semi-rigid displays, minimising overlaminates				MTO 1340	x	100
Hydroprint - Heavy Frost 145HHF - 145 microns	125	145	76	914	x	50
<i>Double diffusion backlight film, printable both sides</i>				914	x	100
<i>And ideal combination of translucency and whiteness great impact both day and night</i>				1524	x	100
Hydroprint - Heavy Frost 195HHF - 195 microns	175	195	76	914	x	50
<i>Double diffusion backlight film, printable both sides</i>				914	x	100
<i>And ideal combination of translucency and whiteness great impact both day and night</i>				1524	x	100
Great scratch resistance with UV inks enables scrolling applications without lamination						

List shows available widths, others possible on enquiry. Price includes conversion to 100lm or simliar rolls.

Customers must agree to take shorter rolls to take account of reel ends.

Shaded items have limited availability at present. Please check with your representative.
